Reading Just imagine how any Baglish dictionaries there are in the world! How do you know which one is the best for you? Let's look at three types of English dictionaries. Bilingual dictionaries: This is probably the first type of dictionary that you bought when you started to study English. Usually, the first half gives the English word along with their meaning in another language, and the second half gives the words in the other language first and then their meanings in English. This kind of dictionary is suitable for those who have just started learning. You can quickly find how to translate a word from your language into English. But sometimes the meaning of the English word is a bit different from the word in the other language. Also this kind of dictionary encourages the students to translate instead of thinking in English. Monolingual dictionaries: These dictionaries use just one language to explain the meanings of the words. These dictionaries are good for students with a more advanced level of English. Monolingual dictionaries: Both monolingual and bilingual dictionaries are available in electronic format. Electronic dictionaries can be really useful if they are properly used. This is especially true with regard to pronunciation, as they often have an audio feature that lets you hear the word spoken. This lets you check your own pronunciation. 55. Teachers are an <u>essential</u> part of our lives. They teach us much more than reading and writing. They teach us life lessons and help us discover who we are and how to succeed.

It's important to appreciate the teachers who are dedicated to their jobs. Even if you feel you have too much homework and too many exams, take a moment to think how important your teachers are. Without them, you wouldn't be where you are today.

Teaching requires a lot of time, preparation, and effort. Outside of the class, teachers write lesson plans, create exams and grade tests. They also attend conference and training sessions to find tools and ways to help students succeed.

Teachers are very knowledgeable on the specific subjects they teach. However, it takes a helpful and dedicated individual to be able to teach effectively. Teaching requires them to stay up-to-date on advances in their field of study. They are busy with a wide variety of responsibilities.

Teachers need to make sure that they know all their students' names and they must learn <u>them</u> quickly. One way of having a productive class is learning students' names.

This article has given you some insight of the hard work and dedication that your teachers use each day at school. Then next time that you see your teachers, tell them you appreciate their help.
